# Introduction

## Apostille and certifications having international electronic or digital validity

As part of the State Modernization Plan, the Electronic Document Management system (GDE) will be implemented as from 15 April 2019 as the only means for generating internationally valid Apostilles and Certifications issued by the Argentine Republic.

Argentine Civil Law Notaries Associations are part of the project, within the framework of the Agreement entered into between the Ministry of Foreign Affairs and Worship and the Federal Council of Argentine Notaries authorizing notaries to issue Apostilles, Internationally Valid Certifications and Signature Certifications.

The new format of the Apostilles and internationally valid Certifications generated through the Electronic Document Management system will continue to have the same national and international legality requirements and will apply to both public documents bearing digital or electronic signatures and documents with holographic signatures. The only difference between one and the other is that e-documents will be required to be embedded in the Apostille/internationally valid certification form, whereas paper-based documents having holographic signatures will not be embedded.

Implementation of the e-Apostille (or (e-APP) and the electronic internationally valid certification has been built around two pillars:

1. The implementation of an automated system for issuance of Apostilles and internationally valid certifications that allows for issuance of electronic Apostilles/certifications and digital Apostilles/certifications attached to the paper-based document.
2. The creation of a central e-Register of all Apostilles/certifications issued in the Argentine Republic.

### Features

- Digitally signed PDF document with a perpetual backup stored in a single centralized repository that guarantees its integrity, accessibility and availability.
- Uniform format for Apostilles and certifications issued by the Ministry of Foreign Affairs and Worship and Argentine Civil Law Notaries Associations.

# Introduction

Apostille and certifications having international electronic or digital validity

- Online verification through the website  
[www.argentina.gob.ar/legalizacion-internacional](http://www.argentina.gob.ar/legalizacion-internacional)

## Type of intervention:

The new tool adapts to the nature and signature of the document issued as follows:

**1 - *E-Apostille*:** Apostille issued through the Electronic Document Management system bearing a digital signature, with the public document generated or reproduced in electronic format, digitalized and deemed an original embedded.

**2 - *Apostille bearing digital signature*:** Apostille issued through the Electronic Document Management system bearing a digital signature, attached to the paper-based public document with holographic signature. The original document is NOT embedded in this Apostille.

**3 - *Internationally Valid Certification*:** Certification issued through the Electronic Document Management system bearing a digital signature, with the public document generated or reproduced in electronic format, digitalized and deemed an original embedded.

**4 - *Internationally Valid Certification bearing digital signature*:** Certification issued through the Electronic Document Management system bearing a digital signature, attached to the paper-based public document with holographic signature. The original document is NOT embedded in this Certification.
