

PRESS RELEASE

The US has invited instability and chaos in the Middle East by ignoring international law, UN resolutions, historical and social realities, and taking the decision to move the Embassy to Jerusalem and has prompted Israel to massacre. The fact that this ominous decision is coincided with the 70th anniversary of the day of the Nakba/Catastrophe reveals the extent of the incitement and provocation.

We condemn all the perpetrators of this massacre and their accomplices who appear to be acting in the first quarter of the 21st century with a Crusader's mind. It is not acceptable for mankind not to speak in a loud voice and in a holistic manner, in the face of the constant violation of the rights of the innocent Palestinian people by the Zionist state for decades, depriving them of their fundamental rights and finally daring this massacre.

History will note these days as a disgrace. The Palestinian people have the right to self-defense. Using violence against oppressed people, Israel as an intruder and USA that is its protector have committed state terrorism and crime against humanity. We call the United Nations and The Hague International Court for duty and if international law exists and humanity has a bit of a conscience, we expect these institutions to investigate immediately Trump and Netanyahu, and to do what should be done.

As we express our condolences to the innocent and oppressed Palestinian people, we think that the whole world will soon understand that not only our brothers who fell martyrs while defending their homeland and their honor, but also the law was massacred. We call all those who have conscience for taking a stand against the US and Israel, shouting their injustice and being solidarity with the Palestinian people. Because, 'in the end, the thing we will remember is the silence of our friends'.
